Answer: ✓

Question **3**

Correct

Mark 1.00 out of 1.00

Flag question

Out of “elif” and “else if”, which is the correct statement in python?

Answer: ✓

Question **4**

Correct

Mark 0.90 out of 1.00

Flag question

Assign to `is_divisible_by_7_not_5` a boolean expression that returns `True` if and only if an input number `num`

- is divisible by 7 but
- is not a multiple of 5.

For example:

Test	Input	Result
1	3	False

Answer: (penalty regime: 10, 20, ... %)

Reset answer

```
1 # YOUR CODE HERE
2 a=int(input())
3 if(((a%5)!=0)and(a%7==0)):
4     print("True")
5 else:
6     print("False")
7
```
